An Important Case.

The injunction suit of Schlager and others, of Pennsylvania, vs. W. B. Rodman, Jr., and others, was argued before Judge Seymour in the U.S. court to-day. The purpose of the suit was to enjoin the sale by Mr. Rodman, mortgagee of land in Hyde county, worth \$40,000 or \$50,000. His Honor took the papers and will render a decision in a few days. The plaintiffs were represented by Messrs. Busbee & Busbee and Fuller & Snow; the defendant, Mr. Rodman, by Col. J. W. Hinsdale.

THE WORLD'S COMMERCE.

NEW YORK, June 10 .- Messrs. Hubbard, Price & Co. in their cotton circular to-night say : The Liverpool market this morning was a severe shock to the bulls, who had hoped that the strength induced here by manipulation would be reflected in an improvement abroad. Contrary to such expectations, the opening cable from Liverpool showed a decline of three points, which, by two o'clock, was increased to nearly five points, the market closing steady at the lowest of the day. The summer posi-tions continue to be the subject of mysterious manipulation. August opened this morning at 12.02 to 12.03, and sold during the day as high as 12 10, from which there was a reaction to the closing figures. The general expectation seems to favor a decidedly better market in the morning, unless Liverpool should greatly disappoint us.

Millinery.

As the season for millivery goods will be over in about one more month, we have decided that in order to make as olean a sweep as possible in this line, to reduce to prices that all will appreciate and take advantage of. We have had an elegant trade in this line during this season and we have kept our stock full and complete at all times, and now at the close of the season, while we have not as large a stock as we carry at the first of the season, yet you are able to find any goods you may wish, and at the same time get them for much less money than you could have done earlier. The big lot of Ribbons we have been advertising is the same goods that we have sold all the season for dresses and hats, and while the price is cut the quality is still the best. We invite the ladies to see some some rare bargains we are offering for the summer months.

Oxford, North Carolina, is the most

eastern of the Piedmont towns. It has the elements of growth in the raw material of the surrounding country, its access by railway to all markets, the industry of its people, its unsurpassed healthfulness. It has doubled its population in three years. In its warehouses it sells 10,000,000 pounds per annum of the best tobacco grown in the world. It will manufacture this entire product in three years. It has already three plug tobacco factories and three smoking tobacco factories and as many more organizing. It has the largest establishment in the world for stemming tobacco for foreign shipment; a large cotton fac-tory is contracted for, to work up the cotton that grows at its doors; and twenty other smaller manufactories. It has three railways entering it and others will reach it during the year. It has schools for boys and for girls of very high grade, and that attract patronage from a dozen States. All the great denominations have churches, and the public schools rank well. Its climate is so even that it is sought by the people of the North in win-ter by those of the lower South in summer. If the great business of the town were omitted its delightful climate would attract thousands to obtain homes under the most favorable circumstances. Consumption is almost unknown and mala-

ris finds no victims near it. The neighboring country is rich in copper, silver, iron and granite. Min eral springs are on every farm. Having recently completed a plant, with the most modern and improved machinery for the manufacture of ice, we are turning out the prettiest, clearest and firmest ice that has ever been manufactured in this country.

Every block being of uniform size, it packs in the car closely, and will suffer less loss in transportation than either natural ice or that manufactured by the old process.

As to purity, we challenge comparison. Every gallon of water we use is first evapora ed into steam under a pressure of one hundred pounds to the square inch and condensed before freezing, thus insuring water as pure as it comes from the clouds. Carload quantities on short notice. Full weights and careful packing guaranteed.
